Topic: "Homes in Trees"

\*Kindly note that this PDF is not to be printed.

**Summary of page no:90**

**Summary:** In one of the branches of this big old tree there is a beehive hanging from it. A beehive is the home of the bees. The bees store honey in the beehive. On the other branch of this tree there is a nest made of twigs and dry leaves. In this nest a mother squirrel lives with her babies. On the thin branches of this tree you will find silky cobwebs made by the spiders. In this tree many animals have built their homes. This tree is like a home for them. At the end of this chapter we came to know about the importance of trees for animals and how they provide shelter to most of the birds too.

## **Word**

## **Meaning**

1.nest	-	home of birds
2.nestlings	-	young birds that have not left the nest
3.twigs	-	small branches without leaves
4.cobwebs	-	a web spun by a spider

Now, look at that branch. Do you see something hanging from it? Well, it is a beehive. It is the home of the bees. The bees store honey in the beehive.

Have you ever seen a beehive?

Now, look at that branch. There is a nest on it made of **twigs** and dry leaves. Do you know who lives there? Look closely. You will see a mother squirrel with her tiny babies.

Look at these branches.

You will find silky **cobwebs** on them. Do you know who made these cobwebs? You are right! The spiders made them.

Have you ever seen a spider weave a web?

**twigs:** small branches without leaves  
**cobwebs:** a web spun by a spider
